Yurii Zaika

Senior Delphi Engineer · Legacy Modernization

Delphi engineer, ten years owning the client side of the trading system at Ukraine's largest grocery network: the VCL desktop application its stores run on daily, MS SQL, the fiscal workflows. Currently migrating it from Delphi 6 to Delphi 12/13 with a purpose-built tool that diffs UI and database mappings between versions.

10 years — in production retail systems, 2016 to now
2 stacks — Delphi and .NET in parallel, with the business running
33 — internal systems of the network I built or extended

EXPERIENCE

2026-03 — present

Independent developer, Personal projects and freelance, Dnipro · remote

– A legacy-code analyzer: Python parses .dfm and .pas files and diffs stored-procedure calls, Next.js renders the system map with annotations.

2016-06 — present

Senior Application Developer, ATB-Market (Ukraine's largest grocery retail network), Dnipro

– Own the client side of the trading system that the network's stores run on daily: supply documents, pricing and fiscal invoices, MS SQL.
– Leading the client migration from Delphi 6 to Delphi 12/13 with an in-house tool that diffs UI and DB mappings between versions.
– Fiscal-law changes delivered end to end: excise stamps and AED, UKTZED, customs simplifications, VAT rates, in a live retail network.
